

ACADEMIC INTELLIGENCE INTERNSHIP

Build the academic knowledge system behind an AI-driven learning product made for KTU students.

HOW THE WORK FLOWS

RESEARCH > **STRUCTURE** > CREATE > **REVIEW** > VALIDATE > **COMMIT** > BUILD

QUED METRICS

Building intelligent solutions for the future of learning.

QUED Metrics is an AI-driven technology startup building intelligent academic solutions that transform the way students learn, understand, and interact with educational content.

We combine technology, structured academic knowledge, and research-driven workflows to create smarter learning experiences for KTU students.

Our vision is simple: make academic knowledge more organized, accessible, and meaningful.

BUILD WITH US

Academic Intelligence Internship Programme

Join the Academic Team at QUED Metrics and become part of a technology initiative focused on reimagining academic learning for KTU students.

THIS IS NOT A MATERIALS-COLLECTION INTERNSHIP

You'll contribute to creating, organizing, validating and improving the academic knowledge that powers a real-world education technology product.

WHAT WE COMBINE

01

Technology

02

Structured academic
knowledge

03

Research-driven
workflows

THE WORK

What you'll work on

Four connected streams. Each one feeds the academic knowledge base that the product is built on.

01

FOUNDATION

Academic Research

Research curriculum-aligned academic resources and build a reliable knowledge foundation.

- Understand KTU syllabus and module structure.
- Research concepts from trusted academic sources.
- Organize subject-wise learning resources.

02

CONTENT

Knowledge Development

Convert complex academic content into structured, student-friendly resources.

- Prepare module-wise notes.
- Create concise concept explanations.
- Develop question-and-answer resources.
- Structure content according to the syllabus.

03

QUALITY

Academic Validation

Ensure every resource meets quality and syllabus standards before it reaches a student.

- Identify missing topics.
- Verify syllabus alignment.
- Remove duplicate or incorrect content.
- Improve overall content quality.

04

PROCESS

Team Collaboration

Work inside a professional technology workflow, not an informal group chat.

- Documentation and review process.
- Collaborative content development.
- Git and GitHub version control.
- Structured project management.

HOW THE WORK FLOWS

RESEARCH > STRUCTURE > CREATE > REVIEW > VALIDATE > COMMIT > BUILD

Every contribution strengthens a growing academic knowledge system designed for students.
Your research. Your analysis. Your attention to detail.

ELIGIBILITY

Who can apply?

We're looking for KTU students who are:

- Curious about technology and AI.
- Detail-oriented and responsible.
- Comfortable working in a collaborative team.
- Willing to learn professional workflows.

Open to students from all KTU engineering branches.

WHAT YOU'LL GAIN

What you take away

AI & Education Exposure

Learn how academic knowledge is transformed into intelligent learning systems.

Research Experience

Work on curriculum research and structured content development.

Professional Workflow

Hands-on experience with documentation, review cycles, and Git/GitHub.

Real Product Experience

Contribute to a technology product designed for real students.

Portfolio & Recognition

An internship certificate, portfolio-worthy experience, and performance-based opportunities within QUED Metrics.

PROGRAMME	Academic Intelligence Internship
ORGANIZATION	QUED Metrics
DOMAIN	AI × Education × Academic Research
ELIGIBILITY	KTU Students – All Branches
MODE	Remote / Hybrid
CERTIFICATE	Yes
